

Cave Diver (Levels I, II, and III)

Does the thought of diving through an underwater cave intrigue you? Cave Diver Levels I, II, and III are three separate courses that build on the previous certification (and Cavern Diver).

Level I Cave Divers will be able to plan and execute limited penetration, simple-navigation no decompression cave dives; Level II Cave Divers are qualified to plan and execute multiple navigational decisions on cave dives with staged cylinders; Level III Cave Divers are qualified to plan and execute extended penetration cave dives.

If you're 18 years old and at least a NAUI Advanced Scuba Diver and Nitrox Diver with 75 logged dives, you may be ready for the challenge of cave diving!
