

Decompression Technique Diver

As you continue your technical diver training, this is one the courses you'll want to take as it gives you a working knowledge of the theory, methods and procedures of planned stage decompression diving.

Your training will include a minimum of six dives including planning and executing a standard stage decompression dive less than 130 fsw / 40 msw. Your instructor will teach you equipment requirements and decompression breathing gas mixtures (including oxygen, Helitrox, and EANx). You'll learn the practical skills and knowledge you need for decompression diving within course parameters.

To enroll, you must be 18 years of age, have 75 logged dives, and are a NAUI Master Scuba Diver, Deep Diver Specialty, Technical EANx Diver and Helitrox Diver.
